

# NEW SYDNEY WILDLIFE WORLD

**COMING SOON**

## Sydney Wildlife World

**Australia's wildest new flora and fauna attraction!**

Opening in late 2006, Sydney Wildlife World will showcase Australia's unique and bizarre flora and fauna, right in the heart of Darling Harbour.

Take a walk on the wild side and jump into Wallaby cliffs with the Yellow-footed rock wallabies, and meet one of Australia's cutest national icons, the koala.

Marvel at Australia's bizarre creepy crawlies or see the scales and tails of our unique reptiles. Adjust your eyes and find out what the possums and quolls get up to after dark in the Nocturnal house, or look out into the red heart of Australia and see how our mammals have adapted to survive in this country's harsh climate.

Be dazzled by scores of colourful butterflies, and explore Flight Canyon and discover which birds live within the heights of a forest canopy and the amazing calling sounds they make.

Allow yourself to be completely immersed within this world class exhibit, where animals will be living within their natural habitats and ecosystems, such as the spectacular two-storey aviary and butterfly house, the canopies of which can be seen from a distance outside the building.
